Name: _____

Color the soybean life cycle

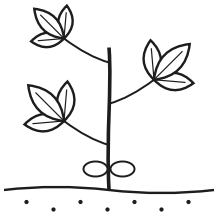

A soybean plant changes a lot from seed to harvest. Color each stage, then read what is happening.

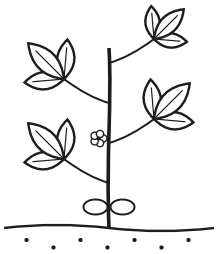

VE
Emergence

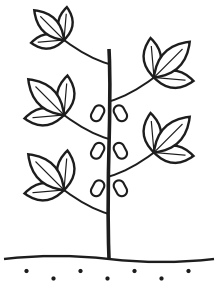

VC
Unifoliate

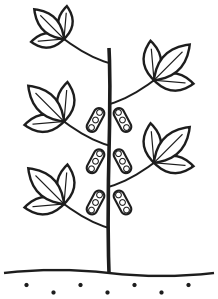

V3
Third trifoliate

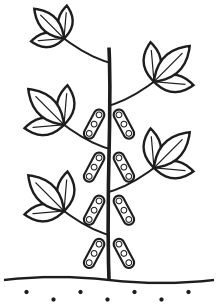

R1
Beginning bloom

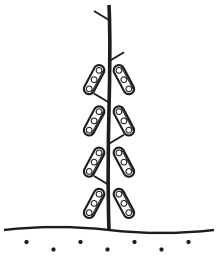

R3
Beginning pod

R5
Beginning seed

R6
Full seed

R8
Full maturity

Color tips: leaves and young pods are green · flowers are white or purple · mature pods (R8) are tan or brown · soil is brown.

Your turn: draw and color a soybean plant at your favorite stage. Label the leaves, stem and pods.
